

Fortunae Bianchello del Metauro Doc

The name **Fortunae** derives from *Fanum Fortunae*, the Latin name for the city of Fano, which is located in the centre of the production area of the **Bianchello del Metauro** vine.

Bianchello, which has made a name for itself as a successful wine, has been widely grown in the northern part of the Marche Region since fairly remote times, so much so that it has become one of the native white varieties par excellence of this Region.

Fortunae is vinified unblended, and is the perfect example of a wine whose excellent drinkability is its strongest characteristic. It stands out for its fresh and light aromas of white fruit and its pleasant almond finish.

Variety 100% Bianchello

First year of production 1986

Municipality/area of production The heart of its typical production area are the hills around the Metauro valley.

Vineyard

The vineyards are cultivated on soils with a natural tendency to clay. The average yield is about ten tons per hectare.

Harvest

The harvest is carried out by hand and normally takes place in the period from the middle to the end of September. The ripening is constantly monitored in order to determine the exact period of the harvest, with the aim in particular of preserving a good acid profile, which represents the basis of this wine's freshness.

Vinification

After static decantation, the prime must is fermented in steel tanks, at a temperature which is kept between 14° and 16°C, for about 8-10 days. The resulting wine does not undergo a malolactic fermentation, in order to preserve the primary aromas. A brief ageing period in steel of about three months is followed by bottling.

Winemaker's notes A fragrant wine, to be drunk young and fresh, with a fine and delicate character starting with its pale straw yellow colour and golden tints. On the nose it is subtle, with fruity and floral aromas, and leaves the palate clean; dry, somewhat lively, with a pleasant almond finish.

Pairings Ideal as an aperitif with lean antipasti and mixed or seafood salads, or with simple dishes based on fish or white meat.

Ideal serving temperature 8-10°C

Glasses for serving Tulip-shaped goblet, with the top edge very slightly flaring, light and elegant in shape, which allows the aromas to be concentrated towards the nose. This is the best way to capture the delicate and fruity bouquet of young wines.

Available formats 75 cl bottle
